

AI Multi-Step Prompt Workflow Assessment

Name : A Siva Krishna

Register Number : 99230040258

1. Assessment Overview

This document contains the completed three-step chained AI workflow required for the assessment. The workflow transforms raw product notes into a polished customer-facing blog post.

Scenario:

Transforming Raw Notes into a Polished Blog Post

Goal:

Take disorganized notes about a new AI-powered learning platform and turn them into a customer-facing blog post, including a self-review and refinement stage.

Workflow:

- Step 1 — Structuring & Planning: Raw notes → structured outline
- Step 2 — Generation/Drafting: Structured outline → first draft
- Step 3 — Critique & Refinement: First draft → critique → final polished version

2. Step 1 — Structuring & Planning

Purpose:

Extract the main user benefits from the raw notes and create a structured outline for the blog post.

Prompt 1 — Exact Prompt Used:

Act as an expert content marketer.

I am going to give you raw, messy notes from a product meeting about a new AI-powered learning platform for college students.

Your task:

1. Extract the 3 main user benefits from these notes.
2. Identify the most important supporting points for each benefit.
3. Create a structured outline for a 500-word customer-facing blog post.

The outline should include:

- A compelling introduction
- The 3 main user benefits as sections
- Supporting points under each section
- A conclusion with a potential Call to Action (CTA)

Raw Notes:

The college is planning to launch an AI-powered learning platform. It provides personalized learning based on each student's progress. Students can receive AI-generated practice questions based on topics they find difficult. The platform tracks student progress and shows areas where they need improvement. Faculty members can use a dashboard to understand overall student performance. Students can access the platform at any time instead of waiting for scheduled classes. The goal is to help students learn more efficiently and identify difficulties earlier.

Intermediate AI Response — Step 1:

Step 1 Output: Structured Blog Post Outline

Title: Learn Smarter with an AI-Powered Learning Platform

Introduction

- Introduce the college's new AI-powered learning platform.
- Explain that the platform is designed to help students learn more efficiently.
- Highlight its ability to adapt to student progress and identify difficulties earlier.

Benefit 1: Get Learning That Fits You

- Learning is personalized according to each student's progress.
- Students receive AI-generated practice questions.
- Practice questions can focus on topics students find difficult.
- This helps students concentrate on areas where they need improvement.

Benefit 2: Discover Areas for Improvement Earlier

- The platform tracks student progress.
- It identifies areas where students need improvement.
- Students can recognize difficulties earlier.
- Earlier identification supports more efficient learning.

Benefit 3: Learn Whenever You Need It

- Students can access the platform at any time.
- Students do not have to wait for scheduled classes to access learning support.
- Faculty members can use a dashboard to understand overall student performance.
- The dashboard gives faculty visibility into student progress.

Conclusion

- Reinforce that the platform combines personalized learning, progress tracking, and flexible access.
- Emphasize the goal of helping students learn more efficiently.
- Potential CTA: Encourage students and faculty to explore the new AI-powered learning platform.

3. Step 2 — Generation/Drafting

Purpose:

Use the Step 1 outline to generate the first draft while strictly following the specified constraints.

Prompt 2 — Exact Prompt Used:

Excellent. Now, using only the outline you just generated, write the first draft of the customer-facing blog post.

Follow these constraints strictly:

- Keep the tone enthusiastic but professional.
- Do not exceed 500 words.
- Use short paragraphs with a maximum of 3 sentences each.
- Clearly explain all 3 main benefits from the outline.
- Include a compelling introduction.
- Include a conclusion with a clear Call to Action (CTA).
- Do not introduce information that was not included in the original raw notes or Step 1 outline.
- Include a placeholder for an image.

After writing the draft, briefly state the approximate word count.

Intermediate AI Response — Step 2:

Learn Smarter with an AI-Powered Learning Platform

College students often face different learning challenges and need support in different areas. A new AI-powered learning platform can help students learn more efficiently by providing personalized learning, tracking progress, and offering flexible access to learning support.

[Image Placeholder: AI-powered learning platform dashboard]

1. Get Learning That Fits You

The platform provides personalized learning based on each student's progress. Instead of following the same learning approach for everyone, students can focus on the topics where they need the most improvement.

Students can also receive AI-generated practice questions based on topics they find difficult. This helps them concentrate their efforts on challenging areas and make their learning more focused.

2. Discover Areas for Improvement Earlier

Understanding progress is an important part of effective learning. The platform tracks student progress and shows areas where students need improvement.

By identifying difficulties earlier, students can recognize the topics they need to work on and focus their learning efforts more effectively. This supports the overall goal of helping students learn more efficiently.

3. Learn Whenever You Need It

Learning does not have to be limited to scheduled classes. Students can access the platform at any time, allowing them to continue their learning without waiting for a scheduled class.

The platform also provides faculty members with a dashboard to understand overall student performance. This gives faculty visibility into student progress and the areas where students may need improvement.

Start Exploring Smarter Learning

The AI-powered learning platform brings together personalized learning, progress tracking, and flexible access to support a more efficient learning experience. It also helps identify student difficulties earlier while giving faculty a clearer view of overall performance.

Call to Action: Explore the new AI-powered learning platform and discover a more personalized way to support learning.

Approximate word count: 340 words.

4. Step 3 — Critique & Refinement

Purpose:

Evaluate the Step 2 draft against a specific checklist and produce a corrected final version. This is the required critique/evaluation gate.

Prompt 3 — Exact Prompt Used:

Before we finalize this, act as a strict senior editor.

Review the blog post you just wrote against the following checklist:

1. Did you stay within the 500-word limit?
2. Does the blog post clearly explain all 3 main user benefits from the Step 1 outline?
3. Is the tone enthusiastic but professional?
4. Are all paragraphs limited to a maximum of 3 sentences?
5. Does the post include a clear Call to Action (CTA) at the end?
6. Does the post avoid introducing information that was not included in the original raw notes or Step 1 outline?
7. Does the post include an image placeholder?

First, provide a concise bullet-point critique identifying any areas where the draft did not fully satisfy the checklist.

Second, produce the final corrected version of the blog post that fixes any identified issues while keeping the same core information and constraints.

At the end, provide the approximate word count of the final version.

Intermediate AI Response — Step 3 Critique:

Senior Editor Critique

- 500-word limit: Satisfied. The draft is well below 500 words.
- 3 main benefits: Satisfied. The draft clearly covers personalized learning, progress tracking, and flexible access with faculty visibility.
- Tone: Satisfied. The tone is enthusiastic and professional.
- Paragraph length: Satisfied. Each paragraph contains no more than 3 sentences.
- CTA: Satisfied. A clear Call to Action appears at the end.
- Original information: Satisfied. The draft stays within the information provided in the original notes and Step 1 outline.
- Image placeholder: Satisfied. An image placeholder is included.

Overall: The draft satisfies all checklist requirements, so only minor refinement is needed for clarity and flow.

Final Corrected Version — Step 3:

Learn Smarter with an AI-Powered Learning Platform

College students face different learning challenges and need support in different areas. A new AI-powered learning platform can help students learn more efficiently by providing personalized learning, tracking progress, and offering flexible access to learning support.

[Image Placeholder: AI-powered learning platform dashboard]

1. Personalized Learning for Every Student

The platform provides personalized learning based on each student's progress. Students can focus on the topics where they need the most improvement.

Students can also receive AI-generated practice questions based on topics they find difficult. This helps them concentrate on challenging areas and make their learning more focused.

2. Track Progress and Identify Difficulties

Understanding progress is an important part of effective learning. The platform tracks student progress and shows areas where students need improvement.

By identifying difficulties earlier, students can recognize the topics they need to work on and focus their learning efforts more effectively. This supports the goal of helping students learn more efficiently.

3. Learn Anytime with Better Faculty Visibility

Learning does not have to be limited to scheduled classes. Students can access the platform at any time, allowing them to continue their learning without waiting for a scheduled class.

The platform also provides faculty members with a dashboard to understand overall student performance. This gives faculty visibility into student progress and areas where students may need improvement.

Start Exploring Smarter Learning

The AI-powered learning platform brings together personalized learning, progress tracking, and flexible access to support a more efficient learning experience. It also helps identify student difficulties earlier while giving faculty a clearer view of overall performance.

Call to Action: Explore the new AI-powered learning platform and discover a more personalized way to support learning.

Approximate word count: 340 words.

5. Submission Checklist

- Prompt Chain Transcript — Include the exact Prompt 1, Prompt 2, and Prompt 3 used above.
- Intermediate AI Responses — Include the Step 1 outline, Step 2 draft, and Step 3 critique/final response.
- Chat Link or Screenshot — Add a screenshot or direct link showing the live three-step conversation in the assigned AI interface.
- Keep all three prompts in the same chat session to demonstrate the required chaining dependency.

6. Live Conversation Evidence
